## **LOUISIANA: A GLOBAL LEADER IN LNG EXPORTS**

**The Louisiana Energy Export Association (LEEA) is the new voice of Louisiana's growing LNG export industry.**

LEEA's member companies are working to create good-paying jobs by investing billions of dollars in Louisiana — all while strengthening the United States as a leader in global trade. LEEA members plan to invest over **\$60 billion** in Louisiana's economy this decade — directly creating over **20,000 construction jobs**, nearly **1,500 good-paying permanent jobs**, and helping **create reliable markets for Louisiana natural gas**.

Our mission is to educate the public and policy makers on the significant economic and trade benefits associated with exporting liquefied natural gas (LNG) from the Louisiana coast.

### **Local Projects, Global Impact**

By the end of this decade, the United States will be one of the three largest exporters of LNG globally, and the vast majority of our LNG exports will flow through Louisiana. In fact, successful final investment decisions and completion of all pro-

posed Louisiana LNG projects would place the state of Louisiana in first place among LNG exporting nations.

Just one large scale LNG project built in Louisiana can reduce the U.S. Trade Deficit by up to \$15 billion.

American allies in Europe, Asia, Africa, and South America will purchase much needed gas from Louisiana export terminals — while helping create jobs, economic opportunity and an expanded tax base in Louisiana.

## Louisiana LNG exports create economic opportunity for Louisiana.

- Over **\$88 billion in LNG projects** proposed, under construction or expected to begin construction in Louisiana this decade.
- More than **30,000 temporary construction jobs** are expected.
- Projected to create approximately **2,000 good-paying, permanent jobs** for Louisianans.
- Overall, LNG exports are expected to create approximately **75,000 jobs** across Louisiana.
- **Tens of billions of dollars** are expected to be spent in Louisiana businesses as a result of the LNG export industry.
